
SKILLS

- **Blockchain Architecture:** Ethereum, Hyperledger Fabric, Solidity, ERC-20, permissioned ledgers, smart contracts, decentralized systems
- **Blockchain Engineering:** Hardhat, Foundry, event streaming, gas optimization, wallet analytics, zk-SNARKs, 5AMLD-aligned controls
- **Architecture & Governance:** enterprise and solution architecture, HLDs, ADRs, architecture reviews, standards, roadmaps, technical governance
- **Engineering:** Go, TypeScript, JavaScript, Python, SQL | Node.js, React, REST APIs, microservices, event-driven architecture
- **Cloud & Delivery:** AWS, EKS, Kubernetes, Docker, Terraform, CI/CD, Kafka, OpenTelemetry, IAM, Zero Trust, audit trails
- **Technical Leadership:** platform selection, design and code reviews, developer guidance, stakeholder alignment, production readiness

EXPERIENCE

- **Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - **Enterprise Architecture & Technical Governance:** Define target-state designs, standards, security controls, and solution-certification practices in a regulated financial institution; lead reviews with product, engineering, risk, security, and infrastructure stakeholders.
 - **0-to-1 Production Platform Ownership:** Designed and led delivery of a patent-pending architecture blueprint platform using Node.js, TypeScript, React, and REST APIs; built rules-based recommendations and auto-certification across 1,000+ architecture patterns.
 - **Architecture Leadership & Hands-On Delivery:** Lead 5 engineers through HLDs, ADRs, design and code reviews, sprint planning, risk decisions, mentoring, production handoff, and executive-ready demonstrations while remaining hands-on in implementation.
 - **Enterprise Platform Architecture:** Architected an OpenTelemetry platform using Vector, Fluent Bit, Kafka, and Logstash that ingests 150 TB/day across 10,000+ systems, replacing point-to-point integrations with resilient, auditable pipelines.
- **HealthCard (Acquired Startup)** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - **End-to-End Blockchain Product Delivery:** Built a pre-insurance payment platform from scratch across React/TypeScript, Node.js/Express APIs, Hyperledger Fabric verification, ERC-20 Solidity contracts, and AWS EKS with HIPAA-aligned audit controls.
 - **Permissioned Ledger Solution Design:** Designed and implemented insurance validation and trust-score logic on Hyperledger Fabric for real-time premium verification and fraud-resistant claims processing; established architecture and delivery practices as the team scaled to 20+ engineers.
 - **Ethereum Engineering & CI/CD:** Implemented gas-optimized smart contracts and automated testing and deployment with Hardhat and Foundry, reducing release cycles from days to under 30 minutes.
- **CryptoVantage** Netherlands (Remote)
Blockchain Developer Jul 2020 – Dec 2020
 - **Ethereum Transaction Monitoring:** Built a real-time on-chain analytics system in Go and JavaScript with Ethereum event streaming, wallet clustering, risk scoring, and APIs for 5AMLD-aligned compliance workflows.
- **Freelance Blockchain Development** Remote
Independent Contractor Jan 2019 – Jun 2020
 - **Blockchain Architecture & Smart Contracts:** Delivered Ethereum smart contracts, DeFi integrations, and permissioned-ledger solutions for multiple clients, owning requirements, architecture, implementation, testing, stakeholder communication, and production handoff.

PROJECTS

- **DCS-BBN: Blockchain-Based Cloud Storage:** Designed a decentralized storage network using Solidity, Hyperledger Fabric, and zk-SNARK proofs for privacy-preserving verification; published in Springer ICMR.

EDUCATION

- **University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- **Dalhousie University** Halifax, Canada
Master of Applied Computer Science, GPA: 3.9/4.0 Jan 2021 – Aug 2022
- **Gujarat Technological University** Ahmedabad, India
B.E. Computer Engineering, GPA: 3.92/4.0 Aug 2016 – Aug 2020
