

SKILLS

Full Stack & UI: React, TypeScript, JavaScript, Node.js, Express, GraphQL, REST APIs
Cloud & Delivery: AWS, GCP, Kubernetes, Terraform, Docker, CI/CD, infrastructure as code
Data & Platform: SQL, data modeling, distributed workflows, audit logging, observability
Quality & Reliability: testing strategy, code reviews, tracing, alerting, incident response
Product & Collaboration: developer experience, documentation, workshops, cross-functional delivery

EXPERIENCE

- Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - Full-Stack Platform Delivery:** Led 0-to-1 production delivery of a Node.js, TypeScript, and React platform with reusable workflows, real-time data rendering, and secure service integration patterns adopted across the organization.
 - Developer Experience & Enablement:** Built reusable implementation guidance and onboarding material that helped internal teams adopt new platform capabilities more quickly and with fewer one-off design decisions.
 - Operational Excellence:** Standardised OpenTelemetry log schemas and onboarding guides used by 20+ engineering teams, improving tracing, alerting, and troubleshooting for production services.
 - Infrastructure Standardization:** Drove Terraform-based infrastructure modules across AWS and GCP to reduce point-to-point integrations, standardize deployments, and improve the consistency of platform services.
 - Technical Leadership:** Led 5 engineers with weekly sprint cadence, code reviews, ADRs, mentorship, and alignment with product, risk, and architecture stakeholders.
- HealthCard** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - Cloud-Native 0-to-1 Build:** Joined as first engineer and built the product from scratch: React/TypeScript frontend, Node.js/Express REST API, Hyperledger Fabric verification layer, and AWS EKS deployment with HIPAA-compliant audit logging.
 - Product Hardening:** Owned architecture decisions across frontend, API, and deployment layers, balancing reliability, maintainability, and security in a small-team environment.
- Dalhousie University** Halifax, Canada
Teaching Assistant & Research Assistant Jan 2021 – Aug 2022
 - Teaching Support:** Supported Software Development, Algorithms, and Advanced Cloud Computing courses through lab sessions, assignment support, and systems fundamentals coaching.
 - Systems Research:** Worked on call-stack decision algorithms for compiler and runtime research, strengthening low-level systems reasoning and execution-path analysis.

PROJECTS

- Workflow Authorization Gateway:** Built a prototype OAuth/OIDC policy layer for MCP and A2A agent access, with audit logging and reusable integration patterns for secure automation.
- Enterprise Auth Sample Pack:** Assembled secure identity integration samples showing login, token handling, and service-to-service authorization patterns for internal developers and architecture reviews.
- DCS-BBN: Blockchain-Based Cloud Storage:** Designed a decentralized storage network using Solidity, Hyperledger Fabric, and zk-SNARK proofs for privacy-preserving verification; published in Springer ICMR.

EDUCATION

- University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- Dalhousie University** Halifax, Canada
Master of Applied Computer Science; GPA: 3.9/4.0 Jan 2021 – Aug 2022
- Gujarat Technological University** India
BE Computer Engineering; GPA: 3.92/4.0 Aug 2016 – Aug 2020
