
SKILLS

- **Applied AI & Agents:** LLMs, RAG, LangChain, LangGraph, agentic workflows, tool calling, prompt/context engineering, OpenAI API
- **AI Reliability:** evaluation sets, regression testing, grounding controls, citation validation, guardrails, tracing, auditability
- **Full Stack:** Python, TypeScript, JavaScript, Go, SQL | FastAPI, Node.js, React, Next.js, REST APIs, GraphQL
- **Data & Distributed Systems:** PostgreSQL, pgvector, Redis, Kafka, Elasticsearch, Airflow, event streams, microservices
- **Cloud & Infrastructure:** AWS (Bedrock, EKS, Lambda, S3, Kinesis), GCP, Kubernetes, Docker, Terraform, CI/CD
- **Production Engineering:** OpenTelemetry, ELK, distributed tracing, SLOs, alerting, incident response, security, privacy
- **Staff Leadership:** technical discovery, executive communication, product strategy, roadmap ownership, mentoring, design reviews

EXPERIENCE

- **Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect – Applied AI / Full Stack Nov 2022 – Present
 - **ASB Assist – Agentic GenAI Product (In Development):** Building a conversational AI layer that turns natural-language business requirements into compliant architecture diagrams and service recommendations through LLM + RAG orchestration, tool integration, context engineering, evaluation, security controls, and audit trails.
 - **0-to-1 Production Platform Ownership:** Designed and led delivery of a patent-pending full-stack platform using Node.js, TypeScript, React, and REST APIs; wrote 99.6% of production code and 100% of core logic for real-time rendering, rules-based recommendations, and auto-certification workflows.
 - **Technical Discovery & Product Strategy:** Work directly with business leaders, principal architects, product, risk, and security to reframe ambiguous problems, define solution scope, challenge low-value requests, present executive-ready options, and steer the platform roadmap toward reusable capabilities.
 - **Distributed Data & Developer Infrastructure:** Architected an OpenTelemetry platform using Vector, Fluent Bit, Kafka, and Logstash that ingests 150 TB/day across 10,000+ systems; standardized schemas and integrations used by 20+ engineering teams.
 - **Staff-Level Leadership:** Lead 5 engineers across concurrent platform, AI, governance, and observability work through architecture decisions, code/design reviews, sprint planning, production handoff, mentoring, and difficult cross-functional trade-offs.
- **HealthCard (Acquired Startup)** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - **Founding-Engineer Product Delivery:** Joined as first engineer and built the product from scratch: React/TypeScript frontend, Node.js/Express APIs, verification services, and AWS EKS deployment with HIPAA-aligned audit logging; the team scaled to 20+ engineers before acquisition.
 - **Applied ML & High-Stakes Workflows:** Integrated transformer-based document classification with insurance validation and trust-score workflows; deployed inference APIs, monitoring, and audit trails that reduced manual review by 60%.
- **Canada Revenue Agency (CRA)** Ottawa, Canada (Remote)
IT Developer / Software Developer Co-op Apr 2022 – Nov 2022
 - **Public-Scale Full-Stack Modernization:** Migrated a federal tax platform from Apache Struts to React/TypeScript and contributed to API layers serving millions of Canadians with accessibility, security, and automated quality gates.
- **CryptoVantage** Netherlands (Remote)
Blockchain Developer Jul 2020 – Dec 2020
 - **Real-Time Risk Platform:** Built an event-driven transaction monitoring system in Go/JavaScript with wallet clustering and risk-scoring pipelines for 5AMLD-aligned compliance teams.
- **Freelance Software Development** Remote
Independent Contractor Jan 2019 – Jun 2020
 - **Client Discovery & End-to-End Delivery:** Scoped and delivered full-stack and blockchain systems for multiple clients, translating business needs into technical plans and owning architecture, implementation, stakeholder communication, and production handoff.

PROJECTS

- **Agentic Engagement Workbench:** Built a Python/FastAPI + React prototype with LangGraph, PostgreSQL/pgvector, tool calling, human approvals, eval sets, tracing, and tenant-scoped audit logs for reliable document-heavy workflows.
- **Automatic Trading Algorithm:** Built a sub-second system integrating live brokerage APIs, real-time data streams, quantitative signals, automated risk controls, position sizing, and production-style performance monitoring.

EDUCATION

- **Dalhousie University** Halifax, Canada
Master of Applied Computer Science, GPA: 3.9/4.0 Jan 2021 – Aug 2022
- **University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- **Gujarat Technological University** Ahmedabad, India
B.E. Computer Engineering, GPA: 3.92/4.0 Aug 2016 – Aug 2020
