

SKILLS

- **Backend & Concurrency:** Java, Spring Boot, Node.js, TypeScript, Go, Python, REST APIs, multithreading, asynchronous processing
- **Distributed Systems:** Kafka, Redis, event-driven architecture, caching, replication, circuit breakers, retries, fault tolerance, capacity planning
- **Cloud & Delivery:** AWS (EKS, Lambda, RDS, S3, Kinesis, CloudWatch), Kubernetes, Docker, Terraform, CI/CD, Linux
- **Data & Reliability:** PostgreSQL, SQL, Elasticsearch, OpenTelemetry, ELK, distributed tracing, SLOs, alerting, incident response, RCA
- **AI-Native Engineering:** Agentic workflows, LLM orchestration, RAG, prompt engineering, AI-assisted testing, API validation, code review
- **Architecture & Leadership:** architecture strategy, design reviews, ADRs, mentoring, security, cross-functional delivery

EXPERIENCE

- **Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - **High-Throughput Event Platform:** Architected an OpenTelemetry platform using Vector, Fluent Bit, Kafka, and Logstash that ingests 150 TB/day across 10,000+ systems with governed schemas, resilient routing, replayable pipelines, and vendor-independent integrations.
 - **Resiliency & Performance Architecture:** Define distributed-system patterns for asynchronous processing, caching, retries, circuit breakers, data consistency, horizontal scaling, multi-environment failover, SLOs, and capacity planning across AWS, GCP, Kubernetes, and on-prem platforms.
 - **Backend Platform Ownership:** Designed and led 0-to-1 production delivery of a patent-pending Node.js/TypeScript platform whose rules engine maps 1,000+ security, integration, and infrastructure patterns to compliant enterprise services.
 - **Operational Excellence:** Drove vendor-agnostic OpenTelemetry standards adopted by 20+ teams; strengthened schema contracts, monitoring, alerting, incident triage, root-cause analysis, and production-readiness practices for regulated systems.
 - **Technical Leadership & AI-Native Delivery:** Lead 5 engineers through hands-on code/design reviews, ADRs, testing strategy, mentoring, and cross-functional decisions; build agentic LLM/RAG workflows under development to accelerate architecture generation and validation.
- **HealthCard (Acquired Startup)** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - **Cloud-Native Transaction Services:** Built the product from scratch with Node.js/Express APIs, React/TypeScript, Hyperledger Fabric verification, and AWS EKS; implemented real-time insurance validation, HIPAA-aligned controls, and end-to-end audit logging.
 - **Scale-Up Engineering:** Containerized services and automated CI/CD, reducing deployments from days to under 30 minutes while improving reliability and maintainability as the engineering team grew to 20+.
- **Canada Revenue Agency (CRA)** Ottawa, Canada (Remote)
IT Developer / Software Developer Co-op Apr 2022 – Nov 2022
 - **Java Platform Modernization:** Modernized a Java/Apache Struts federal tax platform to React/TypeScript and contributed to secure APIs serving millions of Canadians with WCAG compliance and automated quality gates.
- **CryptoVantage** Netherlands (Remote)
Blockchain Developer Jul 2020 – Dec 2020
 - **Real-Time Event Processing:** Built a Go/JavaScript analytics service with Ethereum event streaming, wallet clustering, and low-latency risk-scoring APIs for 5AMLD-aligned compliance workflows.

PROJECTS

- **OpenRTB Auction Exchange Prototype:** Built a Java/Spring Boot service implementing OpenRTB-style bid requests, concurrent demand-partner fan-out, deadline-aware auction selection, Redis-backed frequency caps, circuit breakers, and OpenTelemetry latency instrumentation.
- **Resilient Multi-Region Event Router:** Designed a Kubernetes-based Java service with partitioned event processing, idempotency, backpressure, health-based routing, and regional failover; validated throughput and tail latency with repeatable load tests.

EDUCATION

- **University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- **Dalhousie University** Halifax, Canada
Master of Applied Computer Science, GPA: 3.9/4.0 Jan 2021 – Aug 2022
- **Gujarat Technological University** Ahmedabad, India
B.E. Computer Engineering, GPA: 3.92/4.0 Aug 2016 – Aug 2020
