

SKILLS

- **Web3 & Tokenization:** Ethereum, Solidity, Hyperledger Fabric, ERC-20, smart contracts, wallets, transaction signing, DeFi
- **Blockchain Engineering:** Hardhat, Foundry, event indexing, gas optimization, zk-SNARKs, on-chain analytics, 5AMLD controls
- **Backend & Distributed Systems:** Go, Python, TypeScript, JavaScript, SQL | microservices, REST APIs, Kafka, data modeling
- **Cloud-Native Infrastructure:** AWS, EKS, Kubernetes, Docker, Terraform, CI/CD, event-driven architecture, SRE
- **Reliability & Security:** OpenTelemetry, ELK, distributed tracing, SLOs, audit trails, IAM, Zero Trust, privacy, threat modeling
- **AI Developer Tooling:** LLMs, RAG, agentic workflows, tool integration, prompt/context engineering, code and design automation
- **Staff Leadership:** technical vision, architecture reviews, cross-team initiatives, roadmap ownership, mentoring, executive alignment

EXPERIENCE

- **Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - **Large-Scale Distributed Platform Architecture:** Architected an OpenTelemetry data platform using Vector, Fluent Bit, Kafka, and Logstash that ingests 150 TB/day across 10,000+ systems; replaced point-to-point integrations with resilient, vendor-agnostic pipelines and standardized operational controls.
 - **0-to-1 Production Platform Ownership:** Designed and led delivery of a patent-pending platform using Node.js, TypeScript, React, and REST APIs; wrote 99.6% of production code and 100% of core logic for real-time rendering, recommendation, and auto-certification workflows.
 - **Correctness, Security & Architecture Quality:** Define HLDs, ADRs, data and API contracts, IAM and Zero-Trust patterns, resiliency controls, auditability, and architecture reviews for regulated financial systems spanning cloud, Kubernetes, and on-prem environments.
 - **Technical Leadership Across Teams:** Lead 5 engineers through high-impact multi-team initiatives, remaining hands-on in code and design reviews while driving roadmaps, production handoff, observability, mentoring, and alignment with product, risk, security, and platform leaders.
 - **AI-Assisted Engineering Productivity:** Building ASB Assist, an LLM + RAG interface for generating architecture artifacts and service recommendations from natural-language requirements, with tool integration, security-pattern injection, evaluations, and audit trails.
- **HealthCard (Acquired Startup)** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - **Blockchain Product From Scratch:** Built React/TypeScript applications, Node.js/Express services, Hyperledger Fabric verification, ERC-20 Solidity contracts, and AWS EKS infrastructure with audit logging; the team scaled to 20+ engineers before acquisition.
 - **Token, Identity & Transaction Workflows:** Designed fraud-resistant insurance validation and trust-score logic, permissioned-ledger data models, token contracts, and gas-optimized deployment pipelines using Hardhat/Foundry; reduced releases from days to under 30 minutes.
- **CryptoVantage** Netherlands (Remote)
Blockchain Developer Jul 2020 – Dec 2020
 - **On-Chain Risk & Event Processing:** Built a real-time Ethereum analytics system in Go and JavaScript with event streaming, wallet clustering, transaction risk scoring, and APIs for 5AMLD-aligned compliance workflows.
- **Freelance Blockchain Development** Remote
Independent Contractor Jan 2019 – Jun 2020
 - **Smart Contracts & DeFi Delivery:** Scoped and delivered Ethereum smart contracts, DeFi integrations, and permissioned-ledger architectures for multiple clients, owning design, implementation, testing, stakeholder communication, and production handoff.

PROJECTS

- **Tokenized Asset Lifecycle Prototype:** Built a personal Go/Solidity system for compliant asset issuance, allowlisted transfers, mint/burn controls, wallet signing, corporate-action events, idempotent indexing, reconciliation, and auditable API access.
- **DCS-BBN: Blockchain-Based Cloud Storage:** Designed a distributed storage network using Solidity, Hyperledger Fabric, and zk-SNARK proofs for privacy-preserving verification; published in Springer ICMR.

EDUCATION

- **Dalhousie University** Halifax, Canada
Master of Applied Computer Science, GPA: 3.9/4.0 Jan 2021 – Aug 2022
- **University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- **Gujarat Technological University** Ahmedabad, India
B.E. Computer Engineering, GPA: 3.92/4.0 Aug 2016 – Aug 2020
