

SKILLS

AppSec & Identity: OAuth 2.0, OIDC, SAML, SCIM, threat modeling, secure code review, Zero-Trust
AI & ML: LLMs, RAG, AI governance, machine learning workflows, predictive modeling, AI-integrated architectures
Blockchain & Web3: Hyperledger Fabric, Solidity, Ethereum, smart contracts, decentralized systems
Cloud & Development: Go, Python, TypeScript, Node.js, AWS, GCP, Kubernetes, Terraform, Docker
Observability & Ops: OpenTelemetry, Kafka, ELK, Prometheus, tracing, alerting, incident response
Enablement & Communication: remediation guidance, documentation, workshops, code reviews, stakeholder communication

EXPERIENCE

- Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - Security & AI Governance:** Defined and operationalised enterprise AI governance covering Responsible AI, IAM, audit trails, regulatory compliance, and sovereign-cloud constraints across AWS, GCP, and OCP; the framework was adopted org-wide.
 - Secure Platform Reviews:** Led 0-to-1 delivery of a Node.js, TypeScript, and React platform and partnered with product, risk, and architecture stakeholders on secure design decisions, reusable workflows, and compliant service integration patterns.
 - Observability & Incident Readiness:** Standardised OpenTelemetry log schemas and onboarding guides used by 20+ engineering teams, improving tracing, alerting, and troubleshooting for production services.
 - Terraform & Infrastructure Controls:** Drove Terraform-based infrastructure modules across AWS and GCP to reduce point-to-point integrations, standardize deployments, and make the operational surface easier to review and reason about.
 - Hands-On Leadership:** Led 5 engineers with weekly sprint cadence, code reviews, ADRs, mentorship, and cross-functional alignment with product, risk, and architecture stakeholders.
- HealthCard** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - Secure 0-to-1 Build:** Joined as first engineer and built the product from scratch: React/TypeScript frontend, Node.js/Express REST API, Hyperledger Fabric verification layer, and AWS EKS deployment with HIPAA-compliant audit logging.
 - Risk-Aware Architecture:** Owned architecture decisions across frontend, API, and deployment layers, balancing reliability, maintainability, and security in a small-team environment.
- Dalhousie University** Halifax, Canada
Teaching Assistant & Research Assistant Jan 2021 – Aug 2022
 - Teaching Support:** Supported Software Development, Algorithms, and Advanced Cloud Computing courses through lab sessions, assignment support, and systems fundamentals coaching.
 - Systems Research:** Worked on call-stack decision algorithms for compiler and runtime research, strengthening low-level systems reasoning and execution-path analysis.

PROJECTS

- Agent Authorization Gateway:** Built a prototype OAuth/OIDC policy layer for MCP and A2A agent access, with audit logging, reusable SDK-style integrations, and phishing-resistant authorization flows.
- Enterprise Auth Sample Pack:** Assembled secure identity integration samples showing login, token handling, and service-to-service authorization patterns for internal developers and architecture reviews.
- DCS-BBN: Blockchain-Based Cloud Storage:** Designed a decentralized storage network using Solidity, Hyperledger Fabric, and zk-SNARK proofs for privacy-preserving verification; published in Springer ICMR.

EDUCATION

- University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- Dalhousie University** Halifax, Canada
Master of Applied Computer Science; GPA: 3.9/4.0 Jan 2021 – Aug 2022
- Gujarat Technological University** India
BE Computer Engineering; GPA: 3.92/4.0 Aug 2016 – Aug 2020
