

SKILLS

Agent & Identity: OAuth 2.0, OIDC, SAML, SCIM, token exchange, IAM, SSO, Zero-Trust
AI & Developer Tooling: LLMs, RAG, MCP, A2A, LangChain, SDKs, sample apps, GitHub Copilot
Cloud & Delivery: Go, TypeScript, Python, Node.js, AWS, GCP, Kubernetes, Terraform, Docker
Distributed Systems: reliability, failover, scaling, service-to-service communication, observability
Security & Ops: audit trails, HIPAA, GDPR, OpenTelemetry, Kafka, ELK, Prometheus, alerting

EXPERIENCE

- **Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - **Agent-Ready Platform Delivery:** Led 0-to-1 production delivery of a Node.js, TypeScript, and React platform with reusable workflows, real-time data rendering, and secure service integration patterns used across the organization.
 - **Agent Authorization POCs:** Built ASB Assist, a natural-language architecture generation layer using MCP gateway and agent-gateway patterns; the work combines LLMs, RAG, OAuth, Zero-Trust, and security controls to generate compliant enterprise designs.
 - **Reusable Infrastructure Modules:** Drove Terraform-based modules across AWS and GCP to reduce point-to-point integrations, standardize platform behavior, and make deployments more predictable for downstream teams.
 - **Operational Observability:** Standardised OpenTelemetry log schemas and onboarding guides used by 20+ engineering teams, improving tracing, alerting, and cross-team troubleshooting.
 - **Leadership & Stakeholder Alignment:** Led 5 engineers with weekly sprint cadence, code reviews, ADRs, mentorship, and alignment with product, risk, and architecture stakeholders.
- **HealthCard** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - **Cloud-Native 0-to-1 Build:** Joined as first engineer and built the product from scratch: React/TypeScript frontend, Node.js/Express REST API, Hyperledger Fabric verification layer, and AWS EKS deployment with HIPAA-compliant audit logging.
 - **Platform Hardening:** Owned architecture decisions across frontend, API, and deployment layers, balancing reliability, maintainability, and security in a small-team environment.
- **Dalhousie University** Halifax, Canada
Teaching Assistant & Research Assistant Jan 2021 – Aug 2022
 - **Teaching Support:** Supported Software Development, Algorithms, and Advanced Cloud Computing courses through lab sessions, assignment support, and systems fundamentals coaching.
 - **Research Support:** Worked on call-stack decision algorithms for compiler and runtime research, strengthening low-level systems reasoning and execution-path analysis.

PROJECTS

- **Agent Authorization Gateway:** Built a prototype OAuth/OIDC policy layer for MCP and A2A agent access, with audit logging, reusable SDK-style integrations, and phishing-resistant authorization flows.
- **Enterprise Auth Sample Pack:** Assembled secure identity integration samples showing login, token handling, and service-to-service authorization patterns for internal developers and architecture reviews.

EDUCATION

- **University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- **Dalhousie University** Halifax, Canada
Master of Applied Computer Science; GPA: 3.9/4.0 Jan 2021 – Aug 2022
- **Gujarat Technological University** India
BE Computer Engineering; GPA: 3.92/4.0 Aug 2016 – Aug 2020
