

SKILLS

- **Agentic AI & LLMs:** Python, LangChain, LLM orchestration, RAG, agentic workflows, embeddings, vector databases, prompt engineering, OpenAI API
- **AI Quality & Governance:** LLM evaluation, tracing, Responsible AI, model risk, guardrails, audit trails, IAM, Zero Trust
- **Software Engineering:** TypeScript, JavaScript, Go, SQL, Node.js, React, REST APIs, GraphQL, testing, CI/CD, system design
- **Cloud & Containers:** AWS, GCP, OpenShift, Kubernetes, Docker, Terraform, Infrastructure as Code
- **Data & Retrieval:** PostgreSQL, pgvector, Elasticsearch, Redis, Kafka, Airflow, streaming pipelines, schema design
- **Reliability & Observability:** OpenTelemetry, ELK, distributed tracing, SLOs, alerting, performance analysis, incident response

EXPERIENCE

- **Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - **ASB Assist – Agentic GenAI Workflow (In Development):** Building a natural-language architecture-generation layer using LLM and RAG orchestration to produce compliant diagrams and enterprise service recommendations, with retrieval, prompt/context engineering, security controls, evaluations, and audit trails.
 - **Hands-On Production Platform Engineering:** Designed and shipped a patent-pending Node.js, TypeScript, and React platform with rules-based recommendations, real-time rendering, and auto-certification; wrote 99.6% of production code and all core logic spanning 1,000+ architecture patterns.
 - **Enterprise Reliability & Observability:** Architected an OpenTelemetry platform using Vector, Fluent Bit, Kafka, and Logstash that ingests 150 TB/day across 10,000+ systems; defined vendor-neutral schemas and onboarding adopted by 20+ engineering teams.
 - **AI Standards, Architecture & Mentoring:** Operationalized an enterprise Responsible AI framework across AWS, GCP, and OpenShift; lead five engineers through hands-on design, implementation, code reviews, ADRs, mentoring, and alignment with product, risk, security, and architecture stakeholders.
- **HealthCard (Acquired Startup)** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - **Applied AI in High-Stakes Workflows:** Integrated transformer-based document classification into insurance and credential-verification workflows, reducing manual review by 60% while supporting monitored inference, trust scoring, and HIPAA-aligned audit trails.
 - **Cloud-Native Product Delivery:** Built the product from scratch across React/TypeScript, Node.js/Express APIs, Hyperledger Fabric, and AWS EKS; the engineering team grew to 20+ before acquisition.
- **Canada Revenue Agency (CRA)** Ottawa, Canada (Remote)
IT Developer / Software Developer Co-op Apr 2022 – Nov 2022
 - **Public-Scale Engineering:** Modernized a federal tax platform from Apache Struts to React/TypeScript and contributed to APIs serving millions of Canadians, with accessibility, security, and automated quality gates.
- **CryptoVantage** Netherlands (Remote)
Blockchain Developer Jul 2020 – Dec 2020
 - **Real-Time Risk System:** Built a Go/JavaScript on-chain analytics system integrating Ethereum event streams, wallet clustering, and risk scoring for compliance-oriented transaction monitoring.

EDUCATION

- **Dalhousie University** Halifax, Canada
Master of Applied Computer Science, GPA: 3.9/4.0 Jan 2021 – Aug 2022
- **University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- **Gujarat Technological University** Ahmedabad, India
B.E. Computer Engineering, GPA: 3.92/4.0 Aug 2016 – Aug 2020
