RE: Solutions Architect II (Canada), Ellucian

Dear Hiring Manager,

I am applying for the Solutions Architect II opportunity at Ellucian. In my current role at RBC, I combine enterprise architecture with hands-on platform delivery, translating institutional objectives into solution designs, governance standards, implementation patterns, and measurable operational outcomes. I am based in Toronto and bring Canadian experience across a large regulated enterprise, the federal public sector, and higher-education teaching and research.

At RBC, I designed and led the 0-to-1 production delivery of a patent-pending architecture blueprint platform. The platform maps more than 1,000 architecture patterns to real-time component selections, automates compliant solution blueprints and certification workflows, and has achieved organization-wide adoption. This work requires the same practical bridge between business needs, functional capabilities, technical constraints, product direction, and implementation teams that Ellucian describes for its architecture practice.

I also digitalised RBC's technical reference model, connecting 1,000+ technologies with 1,500+ capabilities and accountable owners. That repository supports standards, roadmap decisions, governance, and modernization planning at scale. In parallel, I architected a telemetry platform processing 150 TB per day across 10,000+ systems and created onboarding guidance adopted by more than 20 engineering teams. These programs strengthened my ability to standardize reusable solutions, facilitate architecture decisions, manage delivery risk, and articulate value through concrete outcomes.

My approach stays close to implementation. I lead five engineers through sprint planning, architecture and code reviews, ADRs, mentoring, and cross-functional alignment with product, risk, security, infrastructure, engineering, and architecture stakeholders. Earlier, as HealthCard's first engineer, I helped take a cloud platform from concept through implementation and supported its growth to a 20+ person engineering team. My time as a teaching and research assistant at Dalhousie also gave me direct experience within a Canadian university environment and a personal connection to technology-enabled learning.

I would bring to Ellucian a strong foundation in capability-driven architecture, cloud modernization, implementation governance, and stakeholder-oriented technical leadership, together with the discipline to learn Ellucian's product landscape and higher-education operating context quickly. I would welcome the opportunity to discuss how that experience could support successful outcomes for Canadian institutions.

Best regards,
Dhruv Doshi

SKILLS

- **Solution Architecture:** enterprise architecture, capability mapping, business-to-technology alignment, target-state design, solution assurance
- **Delivery & Governance:** implementation planning, architecture reviews, ADRs, risk controls, standards, roadmaps, audit trails
- **Cloud & Platforms:** AWS, GCP, Azure patterns, OpenShift/Kubernetes, Docker, Terraform, CI/CD, systems integration, REST APIs
- **Data & Integration:** Kafka, OpenTelemetry, ELK, Snowflake, Airflow, PostgreSQL, event-driven architecture, API gateways
- **Engineering:** TypeScript, JavaScript, Python, Go, React, Node.js, GraphQL, infrastructure as code
- **Leadership:** stakeholder workshops, process mapping, executive communication, cross-functional delivery, mentoring, technical documentation

EXPERIENCE

- **Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - **Solution Architecture & Institutional Alignment:** Translate business requirements into target-state architectures, standards, security controls, and solution certification practices for complex, regulated enterprise platforms.
 - **Architecture Blueprint Platform:** Designed and led 0-to-1 production delivery of a patent-pending platform that maps 1,000+ architecture patterns to component selections, automates compliant solution blueprints, and supports organization-wide adoption.
 - **Capability & Reference Model Governance:** Digitalised RBC's technical reference model covering 1,000+ technologies and 1,500+ capabilities with ownership metadata, enabling standardized governance, roadmap planning, and modernization decisions.
 - **Cloud Modernization & Integration:** Architected reusable AWS, GCP, OpenShift, API gateway, IAM, and Zero Trust patterns; used Terraform to replace point-to-point integrations with governed, repeatable platform services.
 - **Cross-Functional Delivery Leadership:** Led 5 engineers through sprint delivery, architecture and code reviews, ADRs, mentoring, and alignment with product, risk, security, infrastructure, engineering, and architecture stakeholders.
 - **Outcome-Oriented Platform Delivery:** Architected an OpenTelemetry-based platform ingesting 150 TB/day across 10,000+ systems and standardized onboarding guidance adopted by 20+ engineering teams.
- **HealthCard (Acquired Startup)** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - **Cross-Functional Product Implementation:** Built a cloud-based platform from concept through implementation using React, TypeScript, Node.js, AWS EKS, audit logging, and integration workflows; supported growth to 20+ engineers before acquisition.
 - **Process & Controls Design:** Designed real-time insurance validation, credential verification, and fraud-resistant claims workflows with HIPAA-aligned data handling, reducing manual review overhead by 60%.
- **Canada Revenue Agency (CRA)** Ottawa, Canada (Remote)
IT Developer / Software Developer Co-op Apr 2022 – Nov 2022
 - **Public-Sector Platform Modernization:** Migrated a federal tax platform from Apache Struts to React/TypeScript and contributed to APIs serving millions of Canadians while supporting accessibility, procurement, and automated quality standards.
- **Dalhousie University** Halifax, Canada
Research & Teaching Assistant Jan 2021 – Aug 2022
 - **Higher-Education Teaching & Research:** Supported Software Development, Algorithms, and graduate Advanced Cloud Computing courses and researched call-stack decision algorithms for compiler/runtime analysis.

EDUCATION

- **University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- **Dalhousie University** Halifax, Canada
Master of Applied Computer Science, GPA: 3.9/4.0 Jan 2021 – Aug 2022
- **Gujarat Technological University** Ahmedabad, India
B.E. Computer Engineering, GPA: 3.92/4.0 Aug 2016 – Aug 2020
