
SKILLS

- **Enterprise Architecture & Governance:** TOGAF principles, target-state architecture, capability mapping, blueprints, standards, roadmaps, architecture reviews, ADRs
- **Application & Integration:** object-oriented design, service-oriented architecture, microservices, n-tier architecture, REST APIs, API gateways, event-driven architecture, Kafka, enterprise integration patterns
- **Security Architecture:** IAM, OAuth, SSO, Zero Trust, encryption patterns, network security, privacy, audit trails, data governance
- **Cloud & Infrastructure:** AWS, GCP, Azure patterns, OCP/Kubernetes, Docker, Terraform, CI/CD, infrastructure as code, SRE
- **Applications & Data:** TypeScript, JavaScript, Python, Go, SQL | React, Node.js, PostgreSQL, Redis, Elasticsearch
- **Observability:** OpenTelemetry, ELK, Vector, Fluent Bit, Logstash, distributed tracing, SLOs, alerting, CloudWatch
- **Leadership:** senior stakeholder communication, business-technology alignment, risk management, delivery planning, mentoring, vendor integration

EXPERIENCE

- **Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - **Architecture Strategy & Governance:** Define target-state architectures, standards, security controls, and solution certification practices within RBC's Enterprise Architecture group; align business, product, engineering, infrastructure, risk, and security stakeholders through formal design reviews.
 - **ASB Builder Platform – Patent-Pending:** Designed and led 0-to-1 production delivery of an enterprise architecture blueprint platform using Node.js, TypeScript, React, and REST APIs; rules-based recommendations and auto-certification map 1,000+ architecture patterns to compliant component selections.
 - **Complex Solution Design & Integration:** Lead high-level designs, ADRs, reference architectures, and reusable patterns spanning APIs, gateways, IAM, SSO, resiliency, networking, cloud/on-prem integration, data handling, and internal and external service dependencies.
 - **Architecture Roadmaps & Standards:** Digitalised RBC's technical reference model, cataloguing 1,000+ technologies and 1,500+ capabilities with standards and ownership metadata to support governance, modernization roadmaps, and business-technology alignment.
 - **High-Scale Event-Driven Platform:** Architected an OpenTelemetry platform using Vector, Fluent Bit, Kafka, and Logstash that ingests 150 TB/day across 10,000+ systems; replaced point-to-point vendor integrations with standardised, auditable routing.
 - **Architectural Leadership & Delivery:** Led 5 engineers through architecture and code reviews, sprint planning, risk and dependency decisions, mentoring, and executive-ready demonstrations while maintaining alignment across product roadmaps and delivery timelines.
- **HealthCard (Acquired Startup)** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - **Secure Cloud-Native Architecture:** Built a React/TypeScript frontend, Node.js/Express APIs, Hyperledger Fabric verification layer, and AWS EKS deployment with HIPAA-aligned data handling, audit logging, and real-time insurance validation.
 - **End-to-End Architecture Ownership:** Defined application, integration, security, and infrastructure decisions for a 0-to-1 product; established containerised delivery and CI/CD practices as the team scaled to 20+ engineers before acquisition.
- **Canada Revenue Agency (CRA)** Ottawa, Canada (Remote)
IT Developer / Software Developer Co-op Apr 2022 – Nov 2022
 - **Federal Platform Modernization:** Migrated a federal tax platform UI from Apache Struts to React/TypeScript and contributed to APIs serving millions of Canadians while enforcing accessibility, security, and automated quality gates.
- **Dalhousie University** Halifax, Canada
Research & Teaching Assistant Jan 2021 – Aug 2022
 - **Algorithms, Software & Cloud:** Researched call-stack decision algorithms and Python tracing tools; supported Algorithms, Software Development, and graduate Advanced Cloud Computing courses.

PROJECTS

- **Automatic Trading Algorithm:** Built a low-latency trading system integrating brokerage APIs, real-time market data, quantitative signals, automated risk controls, and position sizing.

EDUCATION

- **University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- **Dalhousie University** Halifax, Canada
Master of Applied Computer Science, GPA: 3.9/4.0 Jan 2021 – Aug 2022
- **Gujarat Technological University** Ahmedabad, India
B.E. Computer Engineering, GPA: 3.92/4.0 Aug 2016 – Aug 2020
