RE: VP, Engineering, Rewind

Dear Rewind Hiring Team,

I am applying for the VP, Engineering role at Rewind. Your need for a hands-on technology leader who can connect architecture, cloud reliability, security, engineering execution, and customer outcomes is closely aligned with how I operate today. Based in Toronto, I bring experience building regulated, data-intensive platforms, setting enterprise technology patterns, and leading engineers through complex delivery while remaining directly involved in design and code.

At RBC, I designed and led the 0-to-1 production delivery of a patent-pending architecture blueprint platform using Node.js, TypeScript, and React. Its rules-based recommendation and auto-certification workflows map more than 1,000 architecture patterns to compliant service selections. The work requires a clear product and architecture direction, rapid execution in an air-gapped environment, and close alignment across engineering, product, risk, security, and senior architecture stakeholders. I lead five engineers through sprint planning, hands-on reviews, ADRs, mentorship, and executive demonstrations.

I have also designed infrastructure where reliability and data integrity are fundamental. I architected an OpenTelemetry-based platform using Vector, Fluent Bit, Kafka, and Logstash that ingests 150 TB of telemetry per day across more than 10,000 systems. Standardized pipelines replaced point-to-point vendor integrations, made routing changes configuration-driven, and improved auditability while lowering integration complexity and operational cost. Earlier, as HealthCard's first full-stack engineer, I built a secure cloud-native product from scratch on AWS EKS; the team grew to more than 20 engineers before the company was acquired.

Security and responsible technology governance are equally central to my work. I defined an enterprise AI governance framework spanning model risk, IAM, audit trails, OSFI and GDPR considerations, and sovereign-AI constraints across AWS, GCP, and OCP. I am also building ASB Assist, an LLM-and-RAG interface for generating compliant architecture recommendations from natural-language requirements. This combination has given me practical experience applying AI to engineering work while preserving the controls demanded by sensitive customer data.

Rewind's mission is compelling because backup and recovery turn engineering quality into a direct promise to customers. I would welcome the opportunity to discuss how my experience in hands-on technology strategy, high-scale cloud platforms, security governance, startup product delivery, and accountable team leadership could support Rewind's next stage.

Best regards,
Dhruv Doshi

SKILLS

- **Technology Strategy & Leadership:** enterprise architecture, target-state roadmaps, engineering delivery, team leadership, executive communication, stakeholder alignment
- **Cloud & Reliability:** AWS, GCP, OCP/Kubernetes, Kafka, Terraform, Docker, CI/CD, SRE, SLOs, distributed systems, cost optimization
- **Security & Governance:** Responsible AI, IAM, OAuth, Zero Trust, OSFI, GDPR, HIPAA, audit trails, data governance, architecture reviews
- **AI-Enabled Engineering:** LLMs, RAG, agentic workflows, prompt engineering, OpenAI API, Bedrock, LangChain, vector databases, MCP gateways
- **Product Engineering:** TypeScript, JavaScript, Python, Go, SQL | React, Node.js, REST APIs, GraphQL
- **Data & Observability:** OpenTelemetry, Kafka, ELK, Elasticsearch, distributed tracing, alerting pipelines, Prometheus

EXPERIENCE

- **Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - **Technology Vision & Architecture Strategy:** Shape secure target-state architectures and reusable patterns within RBC's Enterprise Architecture group, aligning engineering, product, risk, security, and infrastructure stakeholders through design reviews and solution certification.
 - **0-to-1 SaaS-Style Platform Delivery:** Designed and led production delivery of a patent-pending architecture blueprint platform using Node.js, TypeScript, and React; its rules-based recommendation and auto-certification workflows map 1,000+ patterns to compliant service selections.
 - **Cloud Reliability & Data Integrity:** Architected an OpenTelemetry platform using Vector, Fluent Bit, Kafka, and Logstash that ingests 150 TB/day across 10,000+ systems, replacing point-to-point vendor integrations with standardized, auditable routing.
 - **Security, Compliance & AI Governance:** Defined an enterprise AI governance framework spanning Responsible AI, model risk, IAM, OSFI and GDPR considerations, audit trails, and sovereign-AI constraints across AWS, GCP, and OCP environments.
 - **AI-Powered Product Development:** Building ASB Assist, an LLM-and-RAG interface that translates natural-language requirements into compliant architecture diagrams and recommendations while applying security and governance patterns.
 - **Engineering Leadership & Operating Discipline:** Lead 5 engineers through sprint planning, hands-on code and architecture reviews, ADRs, mentorship, and executive-ready demonstrations; drive direct cross-functional decisions with product, risk, security, and architecture partners.
 - **Platform Economics & Standardization:** Created reusable Terraform modules and vendor-agnostic observability and API gateway patterns that reduced integration complexity, enabled tooling changes by configuration, and lowered operational cloud spend.
- **HealthCard (Acquired Startup)** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - **Startup Product & Cloud Ownership:** Built a pre-insurance payment product from scratch across React/TypeScript, Node.js APIs, Hyperledger Fabric, and AWS EKS with HIPAA-aligned handling and audit logging; the engineering team grew to 20+ before acquisition.
 - **Scale, Security & Delivery:** Designed real-time validation and fraud-resistant trust workflows, containerized services, and CI/CD automation that reduced deployment cycles from days to under 30 minutes.
- **Canada Revenue Agency (CRA)** Ottawa, Canada (Remote)
IT Developer / Software Developer Co-op Apr 2022 – Nov 2022
 - **Customer-Facing Platform Modernization:** Migrated a federal tax platform UI from Apache Struts to React/TypeScript and contributed to APIs serving millions of Canadians while enforcing accessibility and automated quality gates.
- **CryptoVantage** Netherlands (Remote)
Blockchain Developer Jul 2020 – Dec 2020
 - **Security Analytics:** Built a real-time on-chain monitoring system in Go and JavaScript with event streaming, wallet clustering, and risk scoring for 5AML-aligned compliance workflows.

EDUCATION

- **University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- **Dalhousie University** Halifax, Canada
Master of Applied Computer Science, GPA: 3.9/4.0 Jan 2021 – Aug 2022
- **Gujarat Technological University** Ahmedabad, India
B.E. Computer Engineering, GPA: 3.92/4.0 Aug 2016 – Aug 2020
