

SKILLS

- **Full-Stack Engineering:** TypeScript, JavaScript, Python, Go, SQL, Solidity | React, Node.js, Express, REST APIs, GraphQL
- **Distributed Systems & Cloud:** AWS, EKS, Kubernetes, Kafka, Docker, Terraform, CI/CD, event-driven architecture, microservices
- **Financial & Blockchain Systems:** Ethereum, ERC-20, Hyperledger Fabric, smart contracts, transaction analytics, 5AMLN controls
- **Reliability & Security:** OpenTelemetry, ELK, distributed tracing, SLOs, IAM, Zero Trust, audit trails, HIPAA, OSFI
- **Staff Leadership:** technical strategy, 0-to-1 delivery, architecture reviews, ADRs, mentoring, cross-functional alignment

EXPERIENCE

- **Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - **0-to-1 Full-Stack Platform:** Designed and led production delivery of a patent-pending platform using Node.js, TypeScript, React, and REST APIs; wrote 99.6% of production code and all core logic for real-time rendering, recommendation, and auto-certification workflows.
 - **Large-Scale Reliability Architecture:** Architected a vendor-agnostic OpenTelemetry platform using Vector, Fluent Bit, Kafka, and Logstash that ingests 150 TB/day across 10,000+ systems, replacing point-to-point integrations with standardized, auditable pipelines.
 - **Ambiguous, Cross-Functional Delivery:** Translate complex product and architecture needs into incremental plans, ADRs, API contracts, security patterns, operational controls, and review milestones with product, risk, security, infrastructure, and architecture partners.
 - **Hands-On Technical Leadership:** Lead 5 engineers through sprint execution, code and design reviews, mentoring, risk management, and stakeholder demos while remaining hands-on across backend services, cloud infrastructure, and user-facing workflows.
 - **Global Financial-Services Judgment:** Defined reusable IAM, Zero-Trust, resiliency, auditability, and cloud deployment patterns for regulated systems spanning AWS, GCP, Kubernetes, and security-constrained on-prem environments.
- **HealthCard (Acquired Startup)** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - **Consumer Financial Product From Scratch:** Built a pre-insurance payment product from the ground up: React/TypeScript interfaces, Node.js/Express APIs, Hyperledger Fabric verification, ERC-20 contracts, and AWS EKS infrastructure with HIPAA-aligned audit controls.
 - **Secure Transaction Workflows:** Designed real-time insurance validation and fraud-resistant trust-score logic; automated smart-contract and cloud delivery with Hardhat, Foundry, and CI/CD, reducing release cycles from days to under 30 minutes.
- **Canada Revenue Agency (CRA)** Ottawa, Canada (Remote)
IT Developer / Software Developer Co-op Apr 2022 – Nov 2022
 - **High-Trust Digital Services:** Modernized a federal tax platform from Apache Struts to React/TypeScript and contributed to APIs serving millions of Canadians while enforcing accessibility and automated quality gates.
- **CryptoVantage** Netherlands (Remote)
Blockchain Developer Jul 2020 – Dec 2020
 - **Transaction Risk Engineering:** Built a real-time Ethereum analytics system in Go and JavaScript with event streaming, wallet clustering, and risk scoring for 5AMLN-aligned compliance workflows.

PROJECTS

- **DCS-BBN: Blockchain-Based Cloud Storage:** Designed a distributed storage network using Solidity, Hyperledger Fabric, and zk-SNARK proofs for privacy-preserving verification; published in Springer ICMR.

EDUCATION

- **University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- **Dalhousie University** Halifax, Canada
Master of Applied Computer Science, GPA: 3.9/4.0 Jan 2021 – Aug 2022
- **Gujarat Technological University** Ahmedabad, India
B.E. Computer Engineering, GPA: 3.92/4.0 Aug 2016 – Aug 2020
